COVER LETTER

DEAR SIR / MADAM,

I am a skilled DevOps Engineer with 2+ years of hands-on experience and total 9 years of experience, an expert in Windows OS, MAC OSX & Linux, with a strong development background.

My target is to master the DevOps culture, currently I am focusing on applying Build, Test, maintain the infrastructure to speed up the development and release process using CI /CD and Cloud services.

My previous roles in the IT field started with providing level 1 and level 2 technical support as a Sr. System Administrator, troubleshooting, and maintenance of the technology infrastructure and systems for endpoint device management Including win-servers (2003, 2008, 2012), Mac server, firewall Linux server, Render Farm, network management, NAS, SAN, LAN, WAN, RAID, ticketing systems, software distribution, updates, patching virus protection, and imaging.

Then I became an IT Manager, which was more managerial level than technical Starting with Identify the need for upgrades, configurations or new systems and report to the MD, assign tasks, monitor project pipeline, managing servers, during this time i was preparing myself to be a DevOps engineer.

And currently I am a DevOps Engineer responsible for the CI/CD process starting with using Docker to containerize the application, Infrastructure as a Code using Terraform & Ansible, manage containers through Kubernetes and EKS in AWS and run the pipeline using Gitlab CI/CD.

Besides my main experience in the IT field, I have been using Adobe Products as a hobby to design for the past 12 years and Front-End Development for the past 5 years, I am not a Graphic Designer but I have a quite good taste and freelance experience doing different kind of designs, video editing, and websites, you are welcome to check my website www.johnydev.com

I have enclosed my cover letter for your review. I appreciate your time.

Sincerely,

John Bedeir
