COVER LETTER

DEAR SIR / MADAM,

My name is John, I am a DevOps Engineer offering 9 years of experience, an expert in Windows OS, MAC OSX & Linux, with a strong development background.

My target is to master the DevOps culture, currently I am focusing on Corontainerization Orchestration, CI /CD and Cloud services.

My previous roles in the IT field started with providing level 1 and level 2 technical support as a Sr. System Administrator, troubleshooting, and maintenance of the technology infrastructure and systems for endpoint device management Including win-servers (2003, 2008, 2012), Mac server, firewall Linux server, Render Farm, network management, NAS, SAN, LAN, WAN, RAID, ticketing systems, software distribution, updates, patching virus protection, and imaging.

Then I became an IT Project Manager, which was more managerial level than technical Starting with determine project objectives, predict resources needed, assign tasks, monitor project pipeline until delivered on time, during this time i was preparing myself to be a DevOps engineer.

And currently I am a DevOps Engineer responsible for the CI/CD process however am participating in the project Code and Build as well.

Besides my main experience in the IT field, I have been using Adobe Products as a hobby to design for the past 12 years and Front-End for the past 5 years, I am not a Graphic Designer but I have a quite good taste and freelance experience doing different kind of designs, video editing, and websites, you are welcome to check my website www.johnydev.com

I have enclosed my cover letter for your review. I appreciate your time.

Sincerely,

John Bedeir
DevOps Engineer
